

Dear Prospective Families,

Thank you so much for your interest in Red Apple School. It is an honor that you have chosen to consider our program for the foundation of your child's education.

At Red Apple School we serve children ages 2 (by September 1st of that academic year) through Kindergarten. Our dedicated teachers are passionate about teaching our students in the way that children learn best. Due to our low student teacher ratios, we can differentiate instruction and incorporate play-based hands-on learning that is both fun and engaging. Our trained teachers have a love for the children in the classroom that make all our students feel safe and ready to explore.

Both whole group and center-based instruction are implemented in each classroom. Through the guided learning centers students are allowed to collaborate, and problem solve with their peers while building relationships with one another.

Each classroom engages in an age-appropriate curriculum that incorporates both academics and social-emotional regulation, as well as respect for one another and our differences. Christ is at the center of all our instruction. The scripture teaches us that each child is fearfully and wonderfully made, and we want to honor that in our relationships with your children and in the manner that our classrooms are designed.

If you are looking for a preschool program where your child will come to school each day and feel safe and loved, please come and visit our classrooms and meet some of our amazing staff. We would love to share why parents have chosen Red Apple School for their children's educational foundation since 1966!

Blessings,

Lisa Holley
